3000

**For free-spirits. For business-rebels.
#NewWorkNewBoard**

The space3000 Idea

The requirements for modern workspaces are changing. Creative work in flexible locations is getting more important and Whiteboards are a very important tool. But they're often heavy, inflexible and short-lived. **Our mission is to give users maximum freedom as to how and where they work creatively.** The space3000 boards are so modular and lightweight that frequent room and floor changes are just as possible as outdoor creative sessions.

Designed with agile methods for agile methods: space3000 is the result of the Design Thinking consulting agency *openmjud*. We ourselves were dissatisfied with existing products. So we decided to develop our own solution, together with customers and partners, which **meets the requirements of modern and agile teamwork.**

We started in Berlin in 2018. We focus on local production, fair conditions and co-creation with our customers. Our boards are used in corporations and innovation agencies as well as in co-working spaces all around Germany.

BigBoard

Whiteboard rethought: The BigBoard is designed for people who want to stay flexible in their work. It can be easily grabbed and carried into the adjoining room or even outside. **It can be used upright or crosswise.**

It adapts to your workflow: Leaned against a tree, stuck in our frame or spontaneously hung on the wall. The board, which can be written on both sides, measures **1.10 x 1.92 m** and weighs only **8 kg**.

The cork edge is very soft to the touch, protects the board and its surroundings and is also very stylish.

Measurements	1,10 x 1,92 m Weight: 8 kg
Material	Premium Whiteboardfinish, cork-frame, space3000 lightweight design
List Price	899 €

WildBoard

The WildBoard enables your creativity to flow in any location.

It's composed of two parts: The **modular frame and the portable**

whiteboard. The whiteboard can be locked into the frame and used from both sides. The **little wheels allow easy movement** across your office.

The legs can be dismantled and stowed away with a few movements and without any tools. The frame can also be used for the BigBoard.

The WildBoard offers enough space for creative ideas and **is with its 6 kg the lightest design whiteboard on the market**. The removable board measures **1.10 x 1.40 m**. Locked in the frame it has a **total height of 1.92 m** and a total **weight of 12 kg**.

Measurements Frame	Height: 80 cm Weight: 6 kg
Measurements Board	1,10 x 1,40 m Weight: 6 kg
Material	Premium Whiteboardfinish, cork-frame, space3000 lightweight design
List Price	Board: 699 € Frame: 500 €

Accessories

We currently offer two practical accessories. Our minimalist wall mount allows you to use of WildBoard and BigBoard on one wall. The practical pockets make it easy for you to transport the boards.

spaceWall

spaceBox

Meas.	Each has space for 2 Boards
Material	Polyester 600D with 14 carrying straps
List Price	BigBoard: 149 € WildBoard: 129 €

Material & Production

We are the **only manufacturer to use the natural material cork**. It provides a warm look, a very pleasant feel and protects the boards.

The **whiteboardfinish** was developed by a European brand manufacturer and **ensures a long durability**. In the core we use a self-developed ultra-light sandwich material, which for the first time allows a **very low weight and at the same time a high stability**.

Our products are manufactured under fair conditions in Berlin factories. We are counting on decades of experience, attention to detail and sustainable action. Wherever possible, our products are delivered with electric cars.

We are constantly providing a safe and healthy working environment and are operating in an environmentally responsible and efficient manner.

With agile methods for agile methods. Made in Berlin.
